

# PAIGNTON SEC INFO TECH TRAINING CENTRE LTD

## POLICY FOR EVERY CHILD MATTERS

It is the policy of Paignton Sec Info Tech to ensure that all children are trained and educated to the very best level possible to equip them for the adult world both socially and for employment and further training, as required by the Children's Act 2006.

As well as the vocational training we will also include wherever feasibly possible, as a part of their general education information, support and training to include:

- Being healthy, physically, emotionally and sexually, to help promote healthy lifestyles and to be drug free.
- Staying safe to help avoid maltreatment and exploitation, to help keep young people safe from accidental injury, bullying and crime.
- To enjoy learning and achieve their desired educational goals, to provide each young person with a stretching curriculum and to help them enjoy their recreation.
- To achieve economic well being and encourage them to engage in training after reaching the school leaving age, to live in decent homes and as part of a sustainable community. To allow them access to material goods and transport and to live in households free from low incomes.
- Help them to make a positive contribution and engage in decision making and support their local community, to be law abiding and to develop positive relationships, to choose not to discriminate and to develop self-confidence and deal with change and develop enterprising behaviour.

We will include this additional education in all courses for all young people where appropriate in order to enhance their lives. We will remain aware at all times of the vulnerability of young people and take extra care with regard to health and safety being mindful of the exuberance of youth.

All staff are to report any problems where the welfare of young people are concerned and the Directors will ensure that all steps are taken to protect and support each individual.
